TREE

TREE

Quaking Aspen | *Populus tremuloides*

Plant description

The small leaves of this native tree tremble in the slightest breeze for a beautiful effect. It is indifferent to soil conditions, and can be found in moist, shallow, rocky, or clay soils. The bark is an attractive greenish white. This is an excellent tree for naturalizing. The seed strain we use at Bailey Nurseries is resistant to black spot.

Height: 60-80'

Spread: 30'

Shape: Pyramidal in youth, rounded at maturity

Exposure: Full Sun

Foliage: Green

Fall Foliage: Gorgeous yellow

Zone: 2-7

TREE

TREE

Renaissance Oasis® Paper Birch | *Betula papyrifera* 'Oenci'

Plant description

The most drought-tolerant birch in the Renaissance Series. The juvenile bark is an outstanding red-bronze, turning white with attractive exfoliation. Dense, broad pyramidal form. Dark green leaves turn yellow in fall. Selected for resistance to the bronze birch borer. Developed by Tom Pinney.

Height: 50-60'

Spread: 30-40'

Shape: Pyramidal

Exposure: Full Sun

Foliage: Medium to dark green

Fall Foliage: Yellow

Zone: 3-6

TREE

Firebird® Crabapple | *Malus sargentii* 'Select A'

Plant description

This compact, slow growing crab was discovered by Johnson's Nursery, Menomonee Falls, WI, from a crop of open pollinated *Malus sargentii* seedlings. Red to pink flower buds open to sweet smelling white blossoms. It is smothered in fall with small, dark red fruit that persists until March. A compact and rounded form when young that spreads with age. Slow to medium growth rate. This cultivar is resistant to apple scab.

Height: 10'

Spread: 8'

Shape: Globe, rounding as it matures

Exposure: Full Sun

Foliage: Dark green

Fall Foliage: Green-yellow

Zone: 4-7

TREE

Pink Sparkles® Crabapple | *Malus 'Malusquest'*

Plant description

Covered in masses of bright crimson buds that open to a warm pink blush, Pink Sparkles® Crabapple is a cross between Red Jewel® and Prairifire. The cherry-red fruit that follows matures to a deep wine color in the late fall and persists till spring. The form is upright and compact, becoming pyramidal with age. This crabapple shows good resistance to apple scab, apple mildew, fireblight, and cedar-apple rust. Use as a specimen or plant in groups.

Height: 15'

Spread: 12'

Shape: Compact, pyramidal

Exposure: Full Sun

Foliage: Glossy, dark green

Zone: 4-7

Tree

Prairifire Crabapple | *Malus 'Prairifire'*

Plant description

This disease resistant cross by Dr. Dan Dayton, University of Illinois, has especially good foliage retention during summer. It blooms later than most crabs. The bark is a glossy dark red with numerous prominent lenticels, and the fruit does not drop. 1996 Iowa Tree of the Year.

Height: 15-20'

Spread: 20'

Shape: Upright, spreading becoming rounded

Exposure: Full Sun

Zone: 4-7

TREE

Starlite™ Crabapple | *Malus x 'Jeflute'*

Plant description

A flowering crabapple hardy enough for the northern plains. White flowers bloom in May followed by small, shiny bright red fruit that persists into winter. Starlite™ has dark green, glossy, disease resistant foliage. Good for space challenged sites due to its upright branching habit.

Height: 25'

Spread: 15'

Shape: Upright rounded

Exposure: Full Sun

Foliage: Dark green

Fall Foliage: Yellow

Zone: 2-7

TREE

Northern Empress Japanese Elm | *Ulmus davidiana* var. *Japonica* 'Burgundy Glow' (RFM-74)

Plant description

A very hardy small to medium sized growing elm with a rounded crown, open branching, and attractive summer and fall foliage. Fall foliage changes from green to apricot-orange to burgundy-red before leaf drop. Size and form permit use in smaller homeowner and business landscapes, parks, and boulevard plantings.

Height: 28'

Spread: 24'

Shape: Rounded open crown

Exposure: Full Sun

Foliage: Medium green

Fall Foliage: Advancing fall color changing from an apricot-orange to burgundy-red before leaf drop.

Zone: 3-6

TREE

First Editions® St Croix™ American Elm | *Ulmus americana 'St Croix'*

PP20,097

Plant description

St. Croix™ elm is a new and distinct American elm with good tolerance to Dutch elm disease. With a grand, vase shape and an open, spreading canopy, St. Croix™ promises to revitalize this well-loved shade tree. Its summer foliage is a beautiful dark green with fall foliage turning a wonderful yellow. The selection is a clone from a tree in Minnesota that survived in a stand of DED-infected elms for over 35 years. In testing at the University of Minnesota, St. Croix shows very good DED tolerance in repeated field trials with controlled inoculation. Selected by Chris Bliska.

Height: 60-75'

Spread: 70-90'

Shape: Broadly vase-shaped

Exposure: Full Sun

Foliage: Dark green

Fall Foliage: Yellow

Zone: 3-6

Tree

Triumph™ Elm | *Ulmus 'Morton Glossy'*

Plant description

This selection resulted from a controlled cross between Vanguard™ elm and Accolade® elm, conducted by Dr. George Ware at the Morton Arboretum. Introduced through Chicagoland Grows®, it has an upright habit with strong branching, lustrous dark green foliage and excellent disease and pest resistance.

Height: 60'

Spread: 35-40'

Shape: Upright

Exposure: Full Sun

Foliage: Glossy, deep green

Fall Foliage: Yellow

Zone: 4-7

Tree

Autumn Gold Ginkgo | *Ginkgo biloba* 'Autumn Gold'

Plant description

A male selection of ginkgo with a symmetrical conical form, turning broader with age. A nice yellow fall color. Selected by the Saratoga Horticulture Foundation in California, introduced in 1955.

Height: 50'

Spread: 30'

Shape: Upright broad conical

Exposure: Full Sun

Foliage: Green

Fall Foliage: Yellow

Zone: 4-8

TREE

Northern Acclaim® Honeylocust | *Gleditsia triacanthos* var. *inermis* 'Harve'

Plant description

This cultivar was developed at North Dakota State University, where it outperformed other honeylocust cultivars in winter hardiness. Thornless and seedless, it has a rather upright form similar to Skyline®, and gradually widens with age. This sturdy, vigorous tree is quite drought-resistant as well.

Height: 35-45'

Spread: 30-35'

Shape: Symmetrical & upright, becoming spreading with age

Exposure: Full Sun

Foliage: Dark green

Fall Foliage: Yellow

Zone: 3-6

TREE

Ivory Silk® Japanese Tree Lilac | *Syringa reticulata* 'Ivory Silk'

Plant description

This Sheridan Nursery selection has a sturdy, more compact, oval growth habit than Japanese tree lilac. A most attractive small flowering tree with cherry-like bark, it bears large creamy white flower clusters in early July. It will perform best in full sun. (C®)

Height: 25'

Spread: 15'

Shape: Compact, oval

Exposure: Full Sun

Foliage: Dark green

Fall Foliage: Insignificant

Zone: 3-8

TREE

Espresso™ Kentucky Coffeetree | *Gymnocladus dioica* 'Espresso-JFS'

Plant description

An excellent tree for tough urban locations, Espresso™ Kentucky Coffeetree is vase-shaped with upright, arching branches that provides dappled shade. As a grafted male selection, it bears no messy seed pods. The blue-green leaves are bi-pinnately compound, turning yellow in the fall. The dark coarse bark is an attractive feature in the winter. Tolerant of heat, cold, drought, and wind. A J. Frank Schmidt Nursery introduction.

Height: 50-60'

Spread: 35-40'

Shape: Oval to vase

Exposure: Sun

Foliage: Bluish-green

Fall Foliage: Yellow

Zone: 4-8

TREE

Greenspire® Linden | *Tilia cordata* 'Greenspire'

Plant description

Very suitable for street planting, this 1998 Iowa Tree of the Year has a straight trunk, rich foliage and fragrant, pale yellow flowers.

Height: 40-50'

Spread: 30-35'

Shape: Oval

Exposure: Full Sun

Foliage: Leathery, dark green

Fall Foliage: Yellow

Zone: 4-7

TREE

Redmond Linden | *Tilia americana* 'Redmond'

Plant description

A valuable tree for street planting, 'Redmond' has the largest leaves of the lindens. The dense foliage is glossy green with bright yellow autumn color. Voted 2000 Urban Tree of the Year by the Society of Municipal Arborists.

Height: 40-60'

Spread: 25-30'

Shape: Pyramidal, uniform

Exposure: Full Sun

Foliage: Glossy, light green

Fall Foliage: Bright yellow

Zone: 3-8

TREE

Celebration® Maple | *Acer x freemanii* 'Celzam'

Plant description

This *A. freemanii* hybrid combines the advantages of both silver and red maple: rapid growth, drought tolerance, great fall color, and the ability to grow in most soils. A vigorous grower in youth, it has strong crotch angles, does well in sun or shade, and is seedless. Own root. A Lake County Nursery "ZAM" introduction.

Height: 45'

Spread: 20-25'

Shape: Compact, upright

Exposure: Full Sun

Foliage: Green

Fall Foliage: Yellow

Zone: 4-7

TREE

Deborah Maple | *Acer platanoides* 'Deborah'

Plant description

Discovered as a 'Schwedleri' seedling in Canada in 1967, this COPF introduction is similar to Schwedler but has a superior branching habit. A vigorous grower with a strong, straight central leader, it has brilliant red spring foliage that turns to dark green through summer.

Height: 40-60'

Spread: 40-60'

Shape: Broadly oval

Exposure: Full Sun

Foliage: Brilliant red turning to dark bronze-green

Fall Foliage: Bronze-yellow

Zone: 4-7

Tree

Green Mountain® Sugar Maple | *Acer saccharum* 'Green Mountain'

Plant description

This cultivar has excellent heat tolerance, and performs well in dry, restricted sites. The thick, leathery dark green leaves are covered with a waxy coating, and show good scorch resistance. Green Mountain® retains its color in dry windy summer weather.

Height: 50-75'

Spread: 35-40'

Shape: Upright oval

Exposure: Full Sun

Foliage: Dark green

Fall Foliage: Orange-scarlet

Zone: 4-7

Tree

Inferno™ Sugar Maple | *Acer saccharum* 'Jeferno'

Plant description

A cold hardy selection of Canada's national tree with dark green leaves that turn a fiery orange-red in the fall. This maple is less particular about soil pH than other varieties, but it prefers rich, well drained soil and a sheltered location. With an overall ascending habit Inferno™ is relatively low maintenance. Jeffries Nurseries introduction. (®CA)

Height: 30-40'

Spread: 20-25'

Shape: Upright, oval

Exposure: Full Sun

Foliage: Dark green

Fall Foliage: Orange, red and yellow

Zone: 3-8

Tree

First Editions® Matador™ Maple | *Acer x freemanii* 'Bailston'

Plant description

Selected because of its superior habit and fall color, Matador™ turns deeper red than Autumn Blaze® and colors more consistently than Sienna Glen®. An adaptable tree with an upright, symmetrical form. Gains its fall color a bit later than other cultivars and holds its leaves longer. Excellent choice for lawn, street or park. Discovered in 1997 at our container tree farm by Kevin Johnston of Bailey Nurseries, Inc.

Height: 40-45'

Spread: 20-40'

Shape: Upright oval

Exposure: Full Sun

Foliage: Green

Fall Foliage: Deep red to orange-red

Zone: 4-7

TREE

Fire King™ Musclewood | *Carpinus caroliniana* 'J.N. Select A'

Plant description

An excellent choice for areas with restricted space and sunlight, Fire King™ Musclewood is a hardy and well-structured tree. Selected by Mike Yanny, this variety survived a severe and snowless winter unscathed. A fast grower, with consistent orange-red fall color in full sun that develops a dense round crown as it matures. The seeds and catkins attract wildlife, and it serves as a host to many butterflies in their larval stage such as the Eastern Tiger Swallowtail. Adaptable to a range of soil types, and best grown with a healthy ring of mulch around the root zone. Use as a screen or specimen in the landscape. A Johnson's Nursery introduction.

Height: 25-30'

Spread: 20'

Shape: Upright, rounded

Exposure: Full Sun to Full Shade

Foliage: Green

Fall Foliage: Orange-red

Zone: 3-9

TREE

Crimson Spire™ Oak | *Quercus 'Crimschmidt'*

Plant description

A stately columnar selection originating as a hybrid of *Q. robur* (English oak) and *Q. alba* (white oak), it combines the best characteristics of both varieties. Dark green, mildew resistant foliage turns a bright reddish hue in the fall. Fast growing, with a tight, upright habit, it is adaptable to a wide range of growing conditions. It's columnar form is good fit for narrow spaces as a screen or street tree.

Height: 45'

Spread: 15'

Shape: Columnar to fastigate

Exposure: Full Sun

Foliage: Dark green

Fall Foliage: Rusty red

Zone: 4-8

TREE

Heritage® Oak | *Quercus x macdanielii* 'Clemons'

Plant description

From Heritage Trees, Inc., this cross between *Q. robur* (English oak) and *Q. macrocarpa* (Bur oak) has glossy, dark green, tatter and mildew resistant foliage. A beautiful specimen tree for the front lawn, this is a truly vigorous cultivar.

Height: 60-80'

Spread: 40-50'

Shape: Broadly pyramidal, becoming oval

Exposure: Full Sun

Foliage: Dark green

Fall Foliage: Yellow-brown

Zone: 4-8

TREE

Majestic Skies™ Northern Pin Oak | *Quercus ellipsoidalis* 'Bailskies'

Plant description

Majestic Skies™ is a distinct improvement over the species with straighter branching and a more symmetrical shape. Foliage emerges red in spring and is more substantial and darker green than the species. Excellent red fall color. Northern pin oaks prefer to grow in full sun with deep, well-drained soil. Discovered at Bailey Nurseries.

Height: 60'

Spread: 45'

Shape: Conical in youth, maturing to broad oval

Exposure: Full Sun

Foliage: Thick glossy green

Fall Foliage: Red

Zone: 3-6

TREE

Prairie Stature® Oak | *Quercus x bimundorum* 'Midwest'

Plant description

An outstanding tree in the landscape featuring emerald-green, semi-glossy, leathery foliage with reddish coloration in autumn. Quite dense, pyramidal form. Hybrid oak of English Oak(*Q. robur*)x White Oak (*Q. alba*). Introduced in collaboration North Dakota State University and North Central Regional Plant Introduction Station, Iowa State University, Ames, Iowa.

Height: 30-40'

Spread: 25-30'

Shape: Pyramidal

Exposure: Full Sun

Foliage: Emerald green

Fall Foliage: Reddish purple

Zone: 3-8

TREE

Prairie Cascade Willow | *Salix 'Prairie Cascade'*

Plant description

This COPF introduction from Morden Research Station has the hardiness and glossy foliage of the laurel willow with the cascading habit and golden stem color of the weeping willow. A hardy weeping willow for northern areas, it prefers plentiful moisture.

Height: 35-45'

Spread: 35-40'

Shape: Weeping

Exposure: Full Sun

Foliage: Glossy green

Fall Foliage: Yellow

Zone: 3-6

Apples (*Malus*)

Varieties marked (*) are grafted on a semi-dwarfing rootstock (S-M7) which will produce trees approximately 60% the size of standard apple trees. This will generally result in trees approximately 12-15' tall and 14' wide at maturity. This rootstock will cause trees to produce fruit at an earlier age-usually 4-5 years after planting.

Trunk caliper is generally 1 1/16".

Apples do benefit from cross pollination. Choose multiple varieties with similar bloom time.

Cortland Apple | *Malus 'Cortland'*

Plant description

('Ben Davis' x 'McIntosh') New York, 1915. An older, well-known variety. Medium-sized and bright red with a sprightly tropical flavor. White flesh holds its color well after being cut. Excellent for eating and cooking.

Fireside Apple | *Malus 'Fireside'*

Plant description

('McIntosh' x 'Longfield') University of Minnesota, 1943. Large, red striped fruit with a sweet, pleasant flavor. Excellent flavor good for eating. Good storage life. One of the most popular apples in Minnesota. Resistant to cedar-apple rust. Unsuitable pollinator for 'Connell Red'.

Haralred Apple | *Malus 'Lautz'*

Plant description

A Bailey Nurseries introduction, this red selection of 'Haralson' apple was discovered by Louis Lautz, an orchardist from La Crescent, MN. The fruit is redder and earlier than the standard 'Haralson', yet retains all the good qualities of 'Haralson': juicy, tart, firm, good keeper, extremely hardy and fireblight resistant. This is an excellent variety for northern United States and Canada. Unsuitable pollinator for 'Haralson'.

Honeycrisp | *Malus 'Honeycrisp'*

Plant description

('Keepsake' x unnamed seedling) University of Minnesota, 1991. An exciting apple that is exceptionally crisp and juicy. Flavor is sweet but well-balanced. Excellent storage life, up to 7 months. Has been rated equal to or higher in overall quality than 'Haralson', 'Honeygold' or 'Keepsake' in winter storage trials. Ripens in late September in Minnesota and stores like a late season variety. Has become an outstanding commercial and home orchard variety because of its explosive crispness, flavor and storage life. CPBR #1007, C®

Honeygold Apple | *Malus 'Honeygold'*

Plant description

(Golden 'Delicious' x 'Haralson') University of Minnesota, 1969. Medium to large, yellow apple. Fruit is crisp, juicy and sweet. Excellent for eating as well as cooking. Medium storage life. Similar to Golden 'Delicious', but hardier.

KinderKrisp Apple | *Malus 'KinderKrisp'*

Plant description

Exceptional flavor and crisp texture, much like its parent Honeycrisp, this early ripening variety features much smaller fruit. Perfect size for snacking or kid's lunches, with a good balance of sweet flavors and a crisp, juicy bite. Outstanding variety for homeowners, flowering early in the season and ripening in late August, the fruit is best fresh from the tree, hanging on for an extended period.

Kudos Apple | *Malus 'MN 33' PPAF*

Plant description

This apple features a unique blend of characteristics, including a juicy texture and sweet, balanced flavor with a hint of tropical overtones. Kudos® is a cross between Honeycrisp and Zestar!®, with a similar or slightly later harvest date than Honeycrisp. Like Honeycrisp, this selection is somewhat tolerant of scab. Kudos® has a spreading habit with medium to high vigor. Introduced by the University of Minnesota.

Prairie Magic® Apple | *Malus 'Jefdale'*

Plant description

('Goodland' x 'Mantet') From Manitoba, this apple stands out because of its superior cold hardiness. The flesh is white, crisp and sweeter than 'Goodland'. Delicious eaten out of hand and may also be used for cooking. Introduced by Jeffries Nurseries Ltd.

Zestar! Apple | *Malus 'Minnewashta'*

Plant description

('State Fair' x Minnesota selection) University of Minnesota, 1998. A wonderful new apple cultivar from the University of MN. At last, an early apple that is crisp and juicy! Best known for its excellent sweet tart flavor. Has a much longer storage life than other early apples. Excellent for fresh eating and cooking. Ripens in late August in Minnesota.

Pears (*Pyrus*)

Parker Pear | *Pyrus 'Parker'*

Height: 12-15'
Spread: 8-12'
Exposure: Full Sun
Zone: 3-8

Plant description

1934 University of Minnesota introduction. Open-pollinated seedling of a Manchurian pear. Large, yellow-bronze fruit. Fine grained, tender and juicy. Upright and vigorous grower. Pollinator for 'Luscious'.

Summercrisp Pear | *Pyrus 'Summercrisp'*

Height: 12-15'
Spread: 8-12'
Exposure: Full Sun
Zone: 4-8

Plant description

MNRC - Recognized for many years as the hardiest pear from the University of Minnesota, released in 1985. Free of fireblight. An annual bearer. Fruit is pyriform in shape, 2.5-3" in diameter and 3-3.5" long. Blooms early in May. The fruit should be harvested in mid-August when crisp and still green with a red blush. Fruit harvested at that time is sweet and crisp, and may be stored up to 2 months. Use either 'Parker' or 'Patten' as pollinator.

Peach, Cherry, Plum

(*Prunus*)

Peach and Cherries are self-fruitful while plums mostly need a pollinator.

Contender Peach | *Prunus x 'Contender'*

Plant description

A freestone peach with bright yellow flesh. Matches 'Reliance' in cold-hardiness and tolerance of spring frosts. Sweet, extra-juicy fruit is an absolute delight for fresh eating, canning, baking, and freezing. Self-pollinating. 'Contender' ripens mid-to-late August.

Height: 12-15'

Spread: 15-18'

Exposure: Full Sun

Zone: 4-8

Evans Bali Cherry | *Prunus cerasus 'Evans Bali'*

Deep, dark red fruit 1" in diameter and excellent for baking and fresh eating. The fruit is much sweeter than other sour cherries. Extremely hardy buds.

Height: 15-20'

Spread: 10-12'

Exposure: Full Sun

Zone: 3-8

First Editions® Sweet Cherry Pie™ Cherry | *Prunus 'Eubank'*

Plant description

From Wisconsin orchardist Bill Eubank, this new sour pie cherry has the sweetest tasting cherries we've ever sampled. Although, not quite for fresh eating like a 'Bing', they are fantastic for jams, jellies, and pies. With its compact size, this is a great tree for the home garden or small orchard.

Height: 15'

Spread: 12'

Shape: Upright spreading

Exposure: Full Sun

Foliage: Dark green

Zone: 4-7

Mount Royal | *Prunus 'Mount Royal'*

Plant description

Blue - European Plum. Good eaten off tree. Excellent for dessert, jam and preserves. Tender, juicy flesh. Considered the best blue cultivar in Wisconsin and Minnesota.

Height: 8-12'

Spread: 6-10'

Exposure: Full Sun

Zone: 4-8

Toka Plum | *Prunus 'Toka'*

Plant description

Red - South Dakota Experiment Station introduction, 1911. One of the best pollinators. A medium-sized, richly flavored variety with beautiful apricot color.

Height: 15-20'

Spread: 12-16

Exposure: Full Sun

Zone: 3-8

BlackIce® Plum | *Prunus 'Lydecker'*

Plant description

Plant description

BlackIce™ is a cross between a cherry plum and a conventional Japanese dessert plum resulting in large fruit with superior winter hardiness and an early ripening date. Fruit size and yield is comparable to popular conventional cultivars, however, the ripening date is 2-4 weeks earlier. Has been shown to be hardy and produce fruit in USDA zone 3b. Naturally compact growth habit makes it easy to manage. Use 'La Crescent', 'Waneta' or American Plum for pollination.

Height: 8-12'

Spread: 8-10'

Exposure: Full Sun

Zone: 4-8

Small Fruit

Mary Washington Asparagus | *Asparagus 'Mary Washington'*

A strong growing and productive strain, producing long, thick spears in May and early June. Suitable for freezing.

Height: 3-4'

Spread: 2-3'

Exposure: Full Sun

Zone: 3-7

Pixwell Gooseberry | *Ribes 'Pixwell'*

Plant description

1932. NDSU. Very productive. Pale green fruit becoming pink when ripe. Few thorns. Produces fruit on 2-3 year old wood.

Height: 3-5'

Spread: 3-4'

Exposure: Full Sun

Zone: 3-6

Caroline Raspberry | *Rubus 'Caroline'*

This is a University of Maryland variety that has proven to be one of the most productive varieties for the East and Midwest. It is considered to be the new standard for everbearing varieties. Fruit is larger than 'Heritage', more productive and the taste is very flavorful. 'Caroline' is vigorous and more tolerant of root rot and yellow rust than 'Heritage'. Fruits earlier than 'Heritage'. Leaf coverage reduces sunscald on berry.

Height: 3-4'

Spread: 3-4'

Exposure: Full Sun

Zone: 4-7

Killarney Raspberry | *Rubus 'Killarney'*

Summer bearing. Attractive red berries with great aroma and flavor. Excellent for freezing, canning and of course pie. One of the most disease resistant varieties, making it very easy to maintain. Sturdy growth habit. Released in Manitoba in 1961, thus very winter hardy. A distinct improvement over 'Latham'.

Height: 3-4'

Spread: 3-4'

Exposure: Full Sun

Zone: 3-7

All Star Strawberry | *Fragaria x ananassa* 'All Star'

Plant description

The fruit has excellent flavor and the plant is resistant to verticillium wilt disease. The entire crop ripens in June, mid-to-late season.

Height: 4-10"

Spread: 8-12"

Exposure: Full Sun

Zone: 4-10

Ft. Laramie Strawberry | *Fragaria x ananassa* 'Ft. Laramie'

Plant description

Large scarlet-red berries with honey-sweet flavor. Firm texture is perfect eating fresh, freezing and preserves. Everbearing, producing berries from summer to fall.

Height: 4-10"

Spread: 10-14"

Exposure: Full Sun

Zone: 3-10

Chipmans Canada Red Seed Source Rhubarb | *Rheum 'Chipmans Canada Red'*

Plant description

Bright red stems are delicious for sauces and pies. One of the sweetest of the red rhubarb. Perennial. (Zone 3-8).

Height: 18"

Spread: 24"

Exposure: Full Sun

Zone: 3-8

Shrubs

Meadowlark Forsythia | *Forsythia 'Meadowlark'*

Height: 8-10'
Spread: 6-10'
Shape: Semi-arching
Exposure: Full Sun
Foliage: Dark green
Fall Foliage: Insignificant
Zone: 3-8

Plant description

In collaboration with the Agricultural Experiment Station of North Dakota, South Dakota and the Arnold Arboretum, this hybrid forsythia was developed for the Northern Plains. A shrub with superior flower-bud hardiness and showy, bright yellow spring flowers, its flower buds are hardy to -35°F. It will perform best in full sun.

Vanilla Strawberry™ Hydrangea | *Hydrangea paniculata 'Renhy'*

Height: 6-7'
Spread: 5-6'
Shape: Upright
Exposure: Full Sun to Part Shade
Foliage: Medium green
Fall Foliage: Insignificant
Zone: 3-8

Plant description

The enormous flower heads are a blend of vanilla and strawberry, held upright on red stems. Flowers emerge creamy white in midsummer, change to pink as the night temperatures drop and finally turn strawberry red. New blooms emerge as older blooms change color, giving the plant a multicolored effect in late summer and early fall. The red coloring lasts at least 3-4 weeks. Plants grow upright, then cascade later in the season. Excellent for fresh cut and dried flower arrangements. Flower color varies based on climate and growing conditions. Bred by Jean Renault in France.

Beauty of Moscow Lilac | *Syringa vulgaris* 'Krasavitsa Moskv'

Height: 10-12'
Spread: 8'
Shape: Upright
Exposure: Full Sun
Foliage: Green
Fall Foliage: Insignificant
Zone: 3-7

Plant description

This beautiful lilac produces abundant panicles of double, delicate pale pink flowers on a vigorous, upright plant. It is stunning in bloom. Rarely to never fed on by Japanese beetles.

James Macfarlane Lilac | *Syringa x prestoniae* 'James Macfarlane'

Height: 8'
Spread: 6-10'
Shape: Upright
Exposure: Full Sun
Foliage: Green
Fall Foliage: Insignificant
Zone: 2-7

Plant description

Introduced by the University of New Hampshire. Blooms two weeks later than *Syringa vulgaris* types. True single pink flowers bloom freely. Extremely hardy and adaptable, withstanding moisture conditions fatal to *vulgaris* hybrids.

Pocahontas Lilac | *Syringa x hyacinthiflora* 'Pocahontas'

Height: 10-12'
Spread: 10-12'
Shape: Upright
Exposure: Full Sun
Foliage: Dark green
Fall Foliage: Insignificant
Zone: 2-7

Plant description

Deep maroon-purple buds open to single deep violet florets. A profuse bloomer, covering plant with purple blossoms in spring prior to the French hybrid lilacs. Noted for exceptional hardiness and vigor. Developed by F. L. Skinner, Dropmore, Manitoba, Canada.

President Lincoln Lilac | *Syringa vulgaris* 'President Lincoln'

Height: 8-10'
Spread: 10'
Shape: Upright
Exposure: Full Sun
Foliage: Green
Fall Foliage: Insignificant
Zone: 3-7

Plant description

Possibly the truest blue of any lilac, this French hybrid bears thyrses of single, medium blue flowers. It's a good grower that produces basal shoots readily. Rarely to never fed on by Japanese beetles.

Virtual Violet® Lilac | *Syringa 'Bailbridget'*

Height: 6-8'
Spread: 5-7'
Shape: Upright
Exposure: Full Sun
Foliage: Dark green
Fall Foliage: Insignificant
Zone: 3-7

Plant description

With shiny violet new leaves, deep purple stems, raspberry-purple buds and fragrant violet flowers, Virtual Violet® is aptly named. Leaf petioles remain violet well into the summer. The habit is upright instead of rounded and compact. The dense habit makes it a great choice for a hedge in smaller spaces as well as a welcome addition to foundation plantings. Remarkably mildew-free. This is a controlled cross between Charles Joly and two outstanding National Arboretum varieties. Bred by Don Selinger, Bailey Nurseries retiree. (CBRAF)
