

Rusty Patched Bumble Bee Garden – Full Sun

This garden is for creating a pollinator garden within a yard and is a perfect fit for the Native Pocket Plantings in the Lawns to Legumes program. Consider planting in areas with mesic soil in areas with large amounts of direct sunlight. We designed this collection to have flowering species in all of the bloom seasons and to contain flowers that are of high priority and “superfoods” for the Rusty Patched Bumble Bee.

This kit includes 36 plugs, six plants of six different species. \$90 per kit

Examples of species often appearing in this kit include:

- ◆ **Yarrow**
