# TREE

TREE

## Quaking Aspen | *Populus tremuloides*

### Plant description

The small leaves of this native tree tremble in the slightest breeze for a beautiful effect. It is indifferent to soil conditions, and can be found in moist, shallow, rocky, or clay soils. The bark is an attractive greenish white. This is an excellent tree for naturalizing. The seed strain we use at Bailey Nurseries is resistant to black spot.

**Height:** 60-80'

**Spread:** 30'

**Shape:** Pyramidal in youth, rounded at maturity

**Exposure:** Full Sun

**Foliage:** Green

**Fall Foliage:** Gorgeous yellow

**Zone:** 2-7

## TREE

### Renaissance Oasis® Paper Birch | *Betula papyrifera 'Oenci'*

#### Plant description

The most drought-tolerant birch in the Renaissance Series. The juvenile bark is an outstanding red-bronze, turning white with attractive exfoliation. Dense, broad pyramidal form. Dark green leaves turn yellow in fall. Selected for resistance to the bronze birch borer. Developed by Tom Pinney.

**Height:** 50-60'

**Spread:** 30-40'

**Shape:** Pyramidal

**Exposure:** Full Sun

**Foliage:** Medium to dark green

**Fall Foliage:** Yellow

**Zone:** 3-6

## TREE

### Northern Catalpa | *Catalpa speciosa*

#### Plant description

This fast growing tree has few branches at an early age. Once branched, ascending limbs are gnarled and twisted. In June, 2" long, tube-like white flowers appear in 4-8" panicles. Fruit is a long persistent pod. Great for xeriscapes, it is very tolerant and adaptable.

**Height:** 50-60'

**Spread:** 35-40'

**Shape:** Upright, oval

**Exposure:** Full Sun

**Foliage:** Green, heart-shaped

**Fall Foliage:** Yellow-green

**Zone:** 4-7

## TREE

### First Editions® Gladiator™ Crabapple | *Malus x adstringens 'Durleo'* PP20,167

#### Plant description

Gladiator™ is an excellent ornamental tree with a profusion of bright pink flowers followed by small reddish-purple fruit on a stately, upright crown. Glossy bronze-purple leaves are darker and glossier than Purple Prince, remain lush all season long and are highly disease resistant. Gladiator is an ideal ornamental tree for space-challenged sites including under power lines, as a small boulevard tree or planted in a row for a screen. This is an open pollinated selection of 'Royalty'. Selected by Rick Durand, from Portage la Prairie MB, CA. (®CA)

**Height:** 20'

**Spread:** 9'

**Shape:** Upright

**Exposure:** Full Sun

**Foliage:** Bronze-purple

**Fall Foliage:** Purple

**Zone:** 2-8

## Tree

### Purple Spire® Crabapple | *Malus 'Jefspire'*

#### Plant description

A columnar Crabapple with a narrow and upright form and purple-green foliage. While Purple Spire® is sparsely covered in airy pink flowers in mid-spring, the showy fruit and leaves turn intense purple in the fall making this an outstanding foliage choice for a small tree in narrow spaces or when used as a hedge. Disease-resistant, and tolerant of a range of soil types. Co-introduced by Bylands Nursery and Jeffries Nurseries.

**Height:** 20'

**Spread:** 8-10'

**Shape:** Narrow upright

**Exposure:** Full Sun

**Foliage:** Purple-green

**Fall Foliage:** Purple

**Zone:** 3-8

## TREE

### Royal Raindrops® Crabapple | *Malus transitoria 'JFS-KW5' PP14,375*

#### Plant description

Certainly one of the prettiest red-leaved crabapples we've seen. Has a better summer color and appearance than most red-leaf crabapples. Abundant magenta-pink blossoms stand out handsomely against reddish-purple, cutleaf foliage. Shows good resistance to fireblight. Developed by J. Frank Schmidt & Son Co.

**Height:** 20'

**Spread:** 15'

**Shape:** Upright, spreading

**Exposure:** Full Sun

**Foliage:** Purple

**Fall Foliage:** Orange-red

**Zone:** 4-7

## Tree

### **Sugar Tyme® Crabapple | *Malus 'Sutyzam'***

#### **Plant description**

This disease resistant crab was a 1999 Michigan Growers' Choice Award winner. It has crisp green foliage and pale buds that open to snowy white flowers which completely cover the tree. Spectacular in the landscape as the rich red fruits remain on the tree all year. A Lake County 'ZAM' Introduction.

**Height:** 18'

**Spread:** 15'

**Shape:** Upright, spreading

**Exposure:** Full Sun

**Zone:** 4-7

## TREE

### Northern Empress Japanese Elm | *Ulmus davidiana var. Japonica 'Burgundy Glow'* (RFM-74)

#### Plant description

A very hardy small to medium sized growing elm with a rounded crown, open branching, and attractive summer and fall foliage. Fall foliage changes from green to apricot-orange to burgundy-red before leaf drop. Size and form permit use in smaller homeowner and business landscapes, parks, and boulevard plantings.

**Height:** 28'

**Spread:** 24'

**Shape:** Rounded open crown

**Exposure:** Full Sun

**Foliage:** Medium green

**Fall Foliage:** Advancing fall color changing from an apricot-orange to burgundy-red before leaf drop.

**Zone:** 3-6

## TREE

### Prairie Expedition® American Elm | *Ulmus americana 'Lewis & Clark'*

#### Plant description

Incredibly tough and cold hardy, this American elm native selection is a lone survivor among elm trees that died of Dutch elm disease near Fargo, ND. Displaying a high resistance to the disease, it averages three to four feet of growth annually. Dark green foliage on the classic elm vase shaped canopy will provide quick shade in a variety of locations from cold prairies to harsh urban environments. Hardy to USDA Zone 2b.

**Height:** 55'

**Spread:** 60'

**Shape:** Rounded to spreading vase

**Exposure:** Full Sun

**Foliage:** Dark green

**Fall Foliage:** Yellow

**Zone:** 3-9

## Tree

### **Triumph™ Elm** | *Ulmus 'Morton Glossy'*

#### **Plant description**

This selection resulted from a controlled cross between Vanguard™ elm and Accolade® elm, conducted by Dr. George Ware at the Morton Arboretum. Introduced through Chicagoland Grows®, it has an upright habit with strong branching, lustrous dark green foliage and excellent disease and pest resistance.

**Height:** 60'

**Spread:** 35-40'

**Shape:** Upright

**Exposure:** Full Sun

**Foliage:** Glossy, deep green

**Fall Foliage:** Yellow

**Zone:** 4-7

Tree

## Autumn Gold Ginkgo | *Ginkgo biloba 'Autumn Gold'*

### Plant description

A male selection of ginkgo with a symmetrical conical form, turning broader with age. A nice yellow fall color. Selected by the Saratoga Horticulture Foundation in California, introduced in 1955.

**Height:** 50'

**Spread:** 30'

**Shape:** Upright broad conical

**Exposure:** Full Sun

**Foliage:** Green

**Fall Foliage:** Yellow

**Zone:** 4-8

## TREE

### Thornless Cockspur Hawthorn | *Crataegus crus-galli* var. *inermis*

#### Plant description

A vigorous small ornamental tree. It bears abundant white flowers in June, followed by small bright red persistent fruit in autumn. Although this attractive thornless tree prefers moist conditions, it is also drought tolerant.

**Height:** 15-20'

**Spread:** 15-20'

**Shape:** Rounded, spreading

**Exposure:** Full Sun

**Foliage:** Dark green, glossy

**Fall Foliage:** Orange

**Zone:** 4-7

## TREE

### Northern Acclaim® Honeylocust | *Gleditsia triacanthos var. inermis 'Harve'*

#### Plant description

This cultivar was developed at North Dakota State University, where it outperformed other honeylocust cultivars in winter hardiness. Thornless and seedless, it has a rather upright form similar to Skyline®, and gradually widens with age. This sturdy, vigorous tree is quite drought-resistant as well.

**Height:** 35-45'

**Spread:** 30-35'

**Shape:** Symetrical & upright, becoming spreading with age

**Exposure:** Full Sun

**Foliage:** Dark green

**Fall Foliage:** Yellow

**Zone:** 3-6

## TREE

### **Greenspire® Linden** | *Tilia cordata 'Greenspire'*

#### **Plant description**

Very suitable for street planting, this 1998 Iowa Tree of the Year has a straight trunk, rich foliage and fragrant, pale yellow flowers.

**Height:** 40-50'

**Spread:** 30-35'

**Shape:** Oval

**Exposure:** Full Sun

**Foliage:** Leathery, dark green

**Fall Foliage:** Yellow

**Zone:** 4-7

## TREE

### Redmond Linden | *Tilia americana 'Redmond'*

#### Plant description

A valuable tree for street planting, 'Redmond' has the largest leaves of the lindens. The dense foliage is glossy green with bright yellow autumn color. Voted 2000 Urban Tree of the Year by the Society of Municipal Arborists.

**Height:** 40-60'

**Spread:** 25-30'

**Shape:** Pyramidal, uniform

**Exposure:** Full Sun

**Foliage:** Glossy, light green

**Fall Foliage:** Bright yellow

**Zone:** 3-8

## TREE

### Fall Fiesta® Sugar Maple | *Acer saccharum 'Bailsta'*

#### Plant description

One look is all you'll need to see that Fall Fiesta® is superior to the sort. The branching is full and symmetrical. Leathery, glossy, deep green leaves are resistant to leaf tatter and leafhopper damage. A rapid grower, easy to transplant and also resistant to sun scald and frost cracks. Outstanding fall color, shows far more oranges and reds than other sugar maples. Prefers a moist yet well-drained soil with a slight acidity for optimum growth.

**Height:** 50-75'

**Spread:** 50'

**Shape:** Upright, rounded

**Exposure:** Full Sun

**Foliage:** Glossy, leathery green

**Fall Foliage:** Orange, red, yellow

**Zone:** 3-7

## TREE

### Firefall™ Maple | *Acer x freemanii 'AF #1' PP15,593*

#### Plant description

Firefall™ has an upright-oval form with good branch angles. This selection is male and therefore does not produce nuisance seeds. The foliage is an attractive medium green throughout the summer. Fall color is bright orange to scarlet and develops fairly early. This is a distinct advantage over some existing Freeman maple cultivars that color later and often do not develop much color in northern regions before freezing temperatures cause the foliage to drop. University of Minnesota introduction.

**Height:** 40-60'

**Spread:** 30-40'

**Shape:** Upright, oval

**Exposure:** Full Sun

**Foliage:** Medium green

**Fall Foliage:** Bright orange to scarlet

**Zone:** 4

## Tree

### Sienna Glen® Maple | *Acer x freemanii 'Sienna'*

#### Plant description

A fast growing, hardy maple with uniform branching and a pyramidal form. Tolerant of alkaline, acidic and wet soil conditions. Superior to Autumn Blaze® maple in withstanding strong winds. Is considered a very good substitute for ash varieties.

**Height:** 60'

**Spread:** 40'

**Shape:** Pyramidal

**Exposure:** Full Sun

**Foliage:** Green

**Fall Foliage:** Yellow, orange and red

**Zone:** 3-7

## Tree

### Emerald Lustre® Maple | *Acer platanoides 'Pond'*

#### Plant description

Introduced by Bailey Nurseries in 1979, this shade tree was selected by Don Pond for its outstanding branching habit, hardiness, and vigor. The immature foliage displays an attractive red tinge before maturing to glossy deep green leaves with a slightly wavy margin.

**Height:** 50-60'

**Spread:** 50-60'

**Shape:** Round oval

**Exposure:** Full Sun

**Foliage:** Glossy green

**Fall Foliage:** Yellow

**Zone:** 4-7

## TREE

### Kindred Spirit® Oak | *Quercus x 'Nadler'* PP17,604

#### Plant description

From Heritage Trees, Inc., hybrid of *Quercus robur* *fastigiata* (upright English oak) and *Quercus bicolor* (Swamp white oak) and a sister seedling to Regal Prince Oak. Tight columnar growth habit on this compact selection make it ideal for small urban yards and narrow streets. Foliage is dark green and resistant to powdery mildew.

**Height:** 35'

**Spread:** 6'

**Shape:** Upright

**Exposure:** Full Sun

**Foliage:** Dark green

**Fall Foliage:** Yellow

**Zone:** 4-8

## TREE

### Prairie Stature® Oak | *Quercus x bimundorum 'Midwest'*

#### Plant description

An outstanding tree in the landscape featuring emerald-green, semi-glossy, leathery foliage with reddish coloration in autumn. Quite dense, pyramidal form. Hybrid oak of English Oak(*Q. robur*)x White Oak (*Q. alba*). Introduced in collaboration North Dakota State University and North Central Regional Plant Introduction Station, Iowa State University, Ames, Iowa.

**Height:** 30-40'

**Spread:** 25-30'

**Shape:** Pyramidal

**Exposure:** Full Sun

**Foliage:** Emerald green

**Fall Foliage:** Reddish purple

**Zone:** 3-8

## TREE

## TREE

### Northern Red Oak | *Quercus rubra*

#### Plant description

The fastest growing oak and one of the easiest to transplant, this tree is great for street use or as a landscape tree. The foliage is dense and lustrous and leaves hang on the tree into winter. Named the 1999 Iowa Tree of the Year.

**Height:** 60-80'

**Spread:** 50'

**Shape:** Pyramidal in youth, rounded at maturity

**Exposure:** Full Sun

**Foliage:** Glossy, dark green

**Fall Foliage:** Red to red-brown

**Zone:** 3-8

## TREE

### **Autumn Splendor Buckeye** | *Aesculus x arnoldiana 'Autumn Splendor'*

#### **Plant description**

Buckeyes are beautiful native trees but this one is special because of its brilliant red fall color. Spring brings large white panicles of blooms that are touched with red and yellow. The foliage shows good disease resistance to scorch and leaf blotch. Autumn Splendor was named for its vivid maroon-red fall color. Prefers moist soil and full sun for best flower production. From the University of Minnesota.

**Height:** 30-35'

**Spread:** 25-30'

**Shape:** Rounded

**Exposure:** Full Sun

**Foliage:** Dark green

**Fall Foliage:** Red

**Zone:** 3-8

# Apples (*Malus*)

Varieties marked (\*) are grafted on a semi-dwarfing rootstock (S-M7) which will produce trees approximately 60% the size of standard apple trees. This will generally result in trees approximately 12-15' tall and 14' wide at maturity. This rootstock will cause trees to produce fruit at an earlier age-usually 4-5 years after planting.

Trunk caliper is generally 11/16”.

Apples do benefit from cross pollination. Choose multiple varieties with similar bloom time.

APPLES	AVG Ripening	Blooms	Zone	Flavor	Texture	Fresh Eating	Pies	Sauce	Baking	Storage

- \*KinderKrisp
- \*Kudos
- \*Red Regent

## Standard Rootstock

- Cortland
- Haralred
- Honeycrisp
- Zestar!

## Connell Red | *Malus 'Connell Red'*

### Plant description

('McIntosh' x 'Longfield') University of Minnesota, 1943. A red blush mutation of 'Fireside' apple. Similar to 'Fireside' except that it has more intense red color. Hardy, heavy bearer. Large size. Excellent for eating or cooking. Distinctive flavor. Fruit keeps well until April or May. Unsuitable pollinator for 'Fireside'.

## Cortland Apple | *Malus 'Cortland'*

### Plant description

('Ben Davis' x 'McIntosh') New York, 1915. An older, well-known variety. Medium-sized and bright red with a sprightly tropical flavor. White flesh holds its color well after being cut. Excellent for eating and cooking.

## **Fireside Apple** | *Malus 'Fireside'*

### **Plant description**

('McIntosh' x 'Longfield') University of Minnesota, 1943. Large, red striped fruit with a sweet, pleasant flavor. Excellent flavor good for eating. Good storage life. One of the most popular apples in Minnesota. Resistant to cedar-apple rust. Unsuitable pollinator for 'Connell Red'.

## **Haralred Apple** | *Malus 'Lautz'*

### **Plant description**

A Bailey Nurseries introduction, this red selection of 'Haralson' apple was discovered by Louis Lautz, an orchardist from La Crescent, MN. The fruit is redder and earlier than the standard 'Haralson', yet retains all the good qualities of 'Haralson': juicy, tart, firm, good keeper, extremely hardy and fireblight resistant. This is an excellent variety for northern United States and Canada. Unsuitable pollinator for 'Haralson'.

## Honeycrisp | *Malus 'Honeycrisp'*

### Plant description

('Keepsake' x unnamed seedling) University of Minnesota, 1991. An exciting apple that is exceptionally crisp and juicy. Flavor is sweet but well-balanced. Excellent storage life, up to 7 months. Has been rated equal to or higher in overall quality than 'Haralson', 'Honeygold' or 'Keepsake' in winter storage trials. Ripens in late September in Minnesota and stores like a late season variety. Has become an outstanding commercial and home orchard variety because of its explosive crispness, flavor and storage life. CPBR #1007, C®

## Honeygold Apple | *Malus 'Honeygold'*

### Plant description

(Golden 'Delicious' x 'Haralson') University of Minnesota, 1969. Medium to large, yellow apple. Fruit is crisp, juicy and sweet. Excellent for eating as well as cooking. Medium storage life. Similar to Golden 'Delicious', but harder.

## KinderKrisp Apple | *Malus 'KinderKrisp'*

### Plant description

Exceptional flavor and crisp texture, much like its parent Honeycrisp, this early ripening variety features much smaller fruit. Perfect size for snacking or kid's lunches, with a good balance of sweet flavors and a crisp, juicy bite. Outstanding variety for homeowners, flowering early in the season and ripening in late August, the fruit is best fresh from the tree, hanging on for an extended period.

### Plant description

This apple features a unique blend of characteristics, including a juicy texture and sweet, balanced flavor with a hint of tropical overtones. Kudos® is a cross between Honeycrisp and Zestar!®, with a similar or slightly later harvest date than Honeycrisp. Like Honeycrisp, this selection is somewhat tolerant of scab. Kudos® has a spreading habit with medium to high vigor. Introduced by the University of Minnesota.

## Kudos Apple | *Malus 'MN 33' PPAF*

## Red Regent Apple | *Malus 'Red Regent'*

### Plant description

('Daniels Red Duchess' x 'Delicious' Red) University of Minnesota, 1963. Very popular apple in Minnesota. Medium to large red apple. Flesh is juicy and crisp. Flavor is an outstanding balance of sweet and tart. Excellent for fresh eating and cooking. Good storage life. Becoming one of the most popular apples in Minnesota.

## Zestar! Apple | *Malus 'Minnewashta'*

### Plant description

('State Fair' x Minnesota selection) University of Minnesota, 1998. A wonderful new apple cultivar from the the University of MN. At last, an early apple that is crisp and juicy! Best known for its excellent sweet tart flavor. Has a much longer storage life than other early apples. Excellent for fresh eating and cooking. Ripens in late August in Minnesota.

# Pears (*Pyrus*)

## Parker Pear | *Pyrus 'Parker'*

**Height:** 12-15'  
**Spread:** 8-12'  
**Exposure:** Full Sun  
**Zone:** 3-8

### Plant description

1934 University of Minnesota introduction. Open-pollinated seedling of a Manchurian pear. Large, yellow-bronze fruit. Fine grained, tender and juicy. Upright and vigorous grower. Pollinator for 'Luscious'.

## Summercrisp Pear | *Pyrus 'Summercrisp'*

**Height:** 12-15'  
**Spread:** 8-12'  
**Exposure:** Full Sun  
**Zone:** 4-8

### Plant description

MNRC - Recognized for many years as the hardiest pear from the University of Minnesota, released in 1985. Free of fireblight. An annual bearer. Fruit is pyriform in shape, 2.5-3" in diameter and 3-3.5" long. Blooms early in May. The fruit should be harvested in mid-August when crisp and still green with a red blush. Fruit harvested at that time is sweet and crisp, and may be stored up to 2 months. Use either 'Parker' or 'Patten' as pollinator.

# Peach, Cherry, Plum (*Prunus*)

*Peach and Cherries are self-fruitful while plums mostly need a pollinator.*

## Contender Peach | *Prunus x 'Contender'*

### Plant description

A freestone peach with bright yellow flesh. Matches 'Reliance' in cold-hardiness and tolerance of spring frosts. Sweet, extra-juicy fruit is an absolute delight for fresh eating, canning, baking, and freezing. Self-pollinating. 'Contender' ripens mid-to-late August.

**Height:** 12-15'

**Spread:** 15-18'

**Exposure:** Full Sun

**Zone:** 4-8

## Evans Bali Cherry | *Prunus cerasus 'Evans Bali'*

Deep, dark red fruit 1" in diameter and excellent for baking and fresh eating. The fruit is much sweeter than other sour cherries. Extremely hardy buds.

**Height:** 15-20'

**Spread:** 10-12'

**Exposure:** Full Sun

**Zone:** 3-8

## First Editions® Sweet Cherry Pie™ Cherry | *Prunus 'Eubank'*

### Plant description

From Wisconsin orchardist Bill Eubank, this new sour pie cherry has the sweetest tasting cherries we've ever sampled. Although, not quite for fresh eating like a 'Bing', they are fantastic for jams, jellies, and pies. With its compact size, this is a great tree for the home garden or small orchard.

**Height:** 15'

**Spread:** 12'

**Shape:** Upright spreading

**Exposure:** Full Sun

**Foliage:** Dark green

**Zone:** 4-7

---

## Mount Royal | *Prunus 'Mount Royal'*

### Plant description

Blue - European Plum. Good eaten off tree. Excellent for dessert, jam and preserves. Tender, juicy flesh. Considered the best blue cultivar in Wisconsin and Minnesota.

**Height:** 8-12'

**Spread:** 6-10'

**Exposure:** Full Sun

**Zone:** 4-8

## Toka Plum | *Prunus 'Toka'*

### Plant description

Red - South Dakota Experiment Station introduction, 1911. One of the best pollinators. A medium-sized, richly flavored variety with beautiful apricot color.

**Height:** 15-20'

**Spread:** 12-16

**Exposure:** Full Sun

**Zone:** 3-8

## Waneta Plum | *Prunus 'Waneta'*

### Plant description

Red - South Dakota Experiment Station introduction, 1913. Produces well the first season after planting. One of the best market plums. Fruit is large, red, sweet, juicy and of good quality.

**Height:** 10-15'

**Spread:** 8-12'

**Exposure:** Full Sun

**Zone:** 3-8

**Height:** 15-20'

**Spread:** 15-20'

**Exposure:** Full Sun

**Zone:** 4-8

# Small Fruit

## Mary Washington Asparagus | *Asparagus 'Mary Washington'*

A strong growing and productive strain, producing long, thick spears in May and early June. Suitable for freezing.

**Height:** 3-4'

**Spread:** 2-3'

**Exposure:** Full Sun

**Zone:** 3-7

## Caroline Raspberry | *Rubus 'Caroline'*

This is a University of Maryland variety that has proven to be one of the most productive varieties for the East and Midwest. It is considered to be the new standard for everbearing varieties. Fruit is larger than 'Heritage', more productive and the taste is very flavorful. 'Caroline' is vigorous and more tolerant of root rot and yellow rust than 'Heritage'. Fruits earlier than 'Heritage'. Leaf coverage reduces sunscald on berry.

**Height:** 3-4'

**Spread:** 3-4'

**Exposure:** Full Sun

**Zone:** 4-7

## Killarney Raspberry | *Rubus 'Killarney'*

Summer bearing. Attractive red berries with great aroma and flavor. Excellent for freezing, canning and of course pie. One of the most disease resistant varieties, making it very easy to maintain. Sturdy growth habit. Released in Manitoba in 1961, thus very winter hardy. A distinct improvement over 'Latham'.

**Height:** 3-4'

**Spread:** 3-4'

**Exposure:** Full Sun

**Zone:** 3-7

## All Star Strawberry | *Fragaria x ananassa 'All Star'*

### Plant description

The fruit has excellent flavor and the plant is resistant to verticillium wilt disease. The entire crop ripens in June, mid-to-late season.

**Height:** 4-10"

**Spread:** 8-12"

**Exposure:** Full Sun

**Zone:** 4-10

## Ft. Laramie Strawberry | *Fragaria x ananassa 'Ft. Laramie'*

### Plant description

Large scarlet-red berries with honey-sweet flavor. Firm texture is perfect eating fresh, freezing and preserves. Everbearing, producing berries from summer to fall.

**Height:** 4-10"

**Spread:** 10-14"

**Exposure:** Full Sun

**Zone:** 3-10

## Chipmans Canada Red Seed Source Rhubarb | *Rheum 'Chipmans Canada Red'*

### Plant description

Bright red stems are delicious for sauces and pies. One of the sweetest of the red rhubarb. Perennial. (Zone 3-8).

**Height:** 18"

**Spread:** 24"

**Exposure:** Full Sun

**Zone:** 3-8
