The Fall River Conservation District orders the best quality nursery stock that is available to us to help insure the survival rate of the trees and shrubs.

However, we do not offer any guarantees of their survival rates once they leave our cooler, nor is there a refund offered if they do not survive once they are planted.

Thank you for supporting your local conservation district!
**Full Payment is expected at the time the order is placed**

The trees/shrubs arrive here in April or May. The District will call you when they are ready for pick up. Please give us the phone number that you want us to call to schedule a time for you to pick up your trees.

The District is NOT responsible for any and all stock once it has left the District’s possession; nor for the condition of the tree stock if it is not picked up from the cooler within the allotted time. The District is not responsible for the replanting of the trees.
